- Stream : PCM Percentage : 81

High School (State Board)

Year of Completion - 2019

- Percentage : 83

Experience

Engineer Intern

Indore, M.P.

Strandix System India Private Limited

Jan 2026 – Apr 2026

- Contributed to the development of **AuditWise (Audit Management System)** and a **Aeternis (Cafe Management System)** using **React.js, Material UI, and Tailwind CSS**.
- Built responsive dashboards, reusable UI components, audit workflows, QR-based menu systems, and order management features.
- Integrated **REST APIs using TanStack Query** for efficient data fetching, caching, and state management.
- Implemented **role-based access** controls and collaborated on backend integration, gaining exposure to **Socket.IO and Git workflows**.

Projects

Food Delivery Application

github.com/khushikukreja/Food-del [🔗](#)

- Developed a food delivery platform using **React.js, Node.js, Express.js, and MongoDB** that enables users to browse menus, manage carts, and place orders online.
- Built responsive user interfaces with **React.js and Tailwind CSS** and integrated REST APIs for seamless data flow.
- Implemented **JWT authentication**, routing, and state management to enhance security and user experience.

Prescripto

github.com/khushikukreja/Prescripto [🔗](#)

- Developed a doctor appointment platform using **React.js and Bootstrap** that allows patients to search doctors, view specialties, and book appointments.
- Built reusable React components and responsive interfaces to deliver a seamless user experience across devices.

- Implemented doctor search, filtering, and appointment booking workflows using **React.js** to improve accessibility and usability.
